

Understanding pathways to Amphetamine Type Stimulant use

Invited Symposium

Prof. Eileen Kaner

Institute of Health & Society, Newcastle University

Session Overview

- (1) **Which individual, social and environmental influences shape different pathways of amphetamine type stimulant use over the life course? A systematic review and thematic synthesis of the qualitative literature**

Dr Amy O'Donnell
Newcastle University

- (2) **“It gave me a release from everything I used to think about and try to get away from”: Key themes from ATTUNE and NPS qualitative studies exploring pathways to illicit stimulant use.**

Dr Michelle Addison
Newcastle University

- (3) **Illicit stimulant use from a user perspective**

Chris Strachan
PPI Member, ATTUNE Steering Group

- (4) **Q&A with panel**

Acknowledgements

Funding

This presentation is based on independent research commissioned and funded by the NIHR Policy Research Programme (PRP) and the European Research Area Network on Illicit Drugs (ATTUNE: Understanding Pathways to Stimulant Use: a mixed-methods examination of the individual, social and cultural factors shaping illicit stimulant use across Europe, PRP ref: PR-ST-0416-10001). The views expressed in the presentation are those of the authors and not necessarily those of the NHS, the NIHR, the Department of Health, or ERANID.

Project teams

IHS-Newcastle:

Professor Eileen Kaner, Dr Amy O' Donnell, Dr Ruth McGovern, Professor Eilish Gilvarry; Liam Spencer, Dr Will McGovern, Paul Bogowitz.

European Consortium:

University of Hamburg (coordinator); The Academy of Special Education, Warsaw; De Regenboog Groep, Amsterdam; Office of the Government of the Czech Republic/Charles University Prague.
